# Our mission : Your success

Our expertise in ERP systems allows us to provide comprehensive and integrated solutions that enhance operational efficiency and decision-making. We also design custom software solutions to meet the unique needs of each client, offering maximum flexibility and optimal functionality.

**Neo-Commercial** ensures the management of sales and purchases, payment tracking and optimal stock management.

**Neo-Production** allows the continuous improvement of both the flow and stock management involved in production chains, as well as the manufacturing order planning.

**NEO-Accounting** allows you to automatically generate financial statements, automate the majority of movements starting from the Payroll and Commercial modules, and easily reconcile between banking transactions.

**NEO-Web** allows you to manipulate and track your data online. It handles order entries, deliveries, expenses, and money transfers. It provides detailed stock financial dashboards.

**NEO-Payroll** enables automated payroll processing, effective management of attendance and leaves, and automation of tax and social declarations.

## NEO COMMERCIAL

Neo-Commercial ensures the management of sales and purchases, payment tracking as well as optimal stock management. It is so intuitive that your team can start instantly without getting any training.

- **Stock**
- **Purchase**
- **Sales**
- **Finance**
- **Statistics**

Efficient commercial and marketing actions are all the outcome of well-documented decisions made at the right time. Additionally, your customers usually expect information to be available immediately and that you will be able to confirm a price, an item availability, and a delivery date in real time...

**NEO-Commercial** provides you with detailed information so that you can make the right decisions and focus your strategy on criteria which are appropriate to you.

# OUR STRENGTHS

## **Build Customer Loyalty:**

Efficient order management guarantees new opportunities

**NEO-Commercial** allows you to instantly respond to your customers' questions or enquiries thanks to comprehensive and up-to- date information available in real time.

## **Optimize your distribution chain:**

To fulfill your customers orders, you need a flexible and efficient logistics management system.

**NEO-Commercial** helps you to make the most of your resources and meet your customers' needs and expectations by providing a comprehensive view of your Supply chain.

## **Provide Visibility to Your Team:**

Your employees have permanent access to all information about sales already signed, available stock, orders in progress... Questions like "Has customer X's cheque been cashed?" or "Do we have item Y available in stock?" always find an answer.

## **Access your data abroad:**

**NEO-Commercial** is accessible from your own laptop via a simple internet connection. You can use the various features in real time as if you were in your office. Now, you can travel calmly and peacefully while keeping an eye on your business.

# NEO PRODUCTION

**Neo-Production** enables you to continuously improve the management of flows and stocks included in business chains and the manufacturing order planning according to your resources

- **Batch Management**
- **Production Planning**
- **Calculation of net requirements**
- **Subcontracting Management**

Our experience in the industrial sector has shown us that good planning is a reliable value for business success.

**NEO-PRODUCTION**, the main module of the NEO ERP, is a solution designed for the industrial sector.

Its primary goal is to assist in the planning of production orders as well as tracking produced and consumed items. It also allows for tracking the progress of orders and generating dashboards and graphs.

# OUR ASSETS

## Optimizing the industrial manufacturing Supply Chain:

In order for a company to achieve new levels of profitability and competitiveness, it must optimize its manufacturing chain.

**NEO-PRODUCTION** guides you to use your hardware and human resources in an optimal way.

## Manage your stock of raw materials

Before scheduling production, **NEO-Prod** assists you to ensure that your stock of raw materials is sufficient.

## Have a holistic and timely overview of your workshop:

To be able to satisfy your customer orders, you must be equipped with a flexible and effective supply management system flexible and efficient logistics.

**NEO PRODUCTION** empowers you to leverage your resources effectively while meeting customer needs through comprehensive supply chain visibility.

## NEO ACCOUNTING

**NEO-Accounting** makes it possible to ensure the standard functions of accounting and, above all, the calculation of the variable costs of each product by managing direct and indirect expenses.

- **Automatic balance sheet**
- **Trial balance and reconciliation**
- **Automatic journal entry generation**
- **Depreciation schedule**

The accounting and financial management offered by **NEO-COMPTA** is especially well-suited for all types of companies, providing comprehensive automation for intercompany accounts.

**NEO-COMPTA** integrates seamlessly into any management environment, ensuring compliance with both standard accounting frameworks and specific regulatory requirements.

With **NEO-COMPTA**, you can:

- Automatically generate financial statements
- Automate most transactions from the Payroll and Sales modules
- Easily verify bank operations

# OUR ASSETS

**NEO-Accounting** allows you to safely manage your accounts no matter where you are. How does it work?

A copy of your data is stored in real-time in the cloud.

In order to have access to your data and make use of them, you just need an Internet connection.

## Synchronize your bank data instantly:

**NEO-Accounting** helps you enter the bank expenses very easily and point out bank transactions in the wink of an eye.

## Automatic Generation of financial transactions:

**NEO-Accounting** helps you reduce costs by generating automatically invoice accounting entries, customer and supplier payments as well as all expenses such as employees' salaries.

## NEO PAYROLL

**NEO-Payroll** enables an automated payroll edition, an effective management of time, attendance and leaves, automation of tax and social security declarations, a reliable synchronization with accounting and generation of summary tables.

- **Leave, absences and extra- hours**
- **Individual setup**
- **Time & attendance Import**
- **Social Security Declaration and Personal Income Tax**

Payroll management is at the heart of personnel administration management. Being more than a technical process, pay is a complex and particularly sensitive issue.

**NEO-Payroll** allows for an automated payroll edition, an automation of social security declarations, a reliable synchronization with accounting and a generation of summary tables.

# OUR ASSETS

Our experience has shown us that both good HR and payroll management is an essential value for the success of the company.

**NEO PAYROLL**, NEO ERP module, is the ideal solution for payroll management: From employee data entry up to the issue of pay slips and social security and tax declarations.

## Simplified calculation of pay slips:

**NEO-PAYROLL** retrieves the score (Time & Attendance) automatically and easily enter advances and loans so as to ensure that pay slips are calculated in the blink of an eye.

## Automating financial procedures:

**NEO-PAYROLL** allows you to generate orders of bank Wire transfers and the statements necessary to have visibility over personnel expenses.

## NEO WEB

**NEO-WEB** allows you to manipulate and track your data online. It ensures the entry of orders, delivery notes, your expenses and interagency money transfers. It also allows detailed tracking of your third-party records and financial dashboards.

- **Inventory management**
- **Sale and purchase**
- **Finance and treasury**
- **Statistics**

Ready and opt for a **NEO-WEB** integration in order to manage your basic business and nancial operations such as delivery notes and payments.

Thanks to a privileged development, you Will benefit from an advanced and comprehensive customization. So, our web solutions destined for ERP provide a specific answer to your needs and make you discover the possibilities offered by all the latest web technologies.

# OUR ASSETS

## Your data is within your reach:

**NEO-WEB** enables you to have access to your business and financial data in real-time.

Thus, you can consult the stock and check the card of your customer via phone.

## Optimal management of maintenance processes:

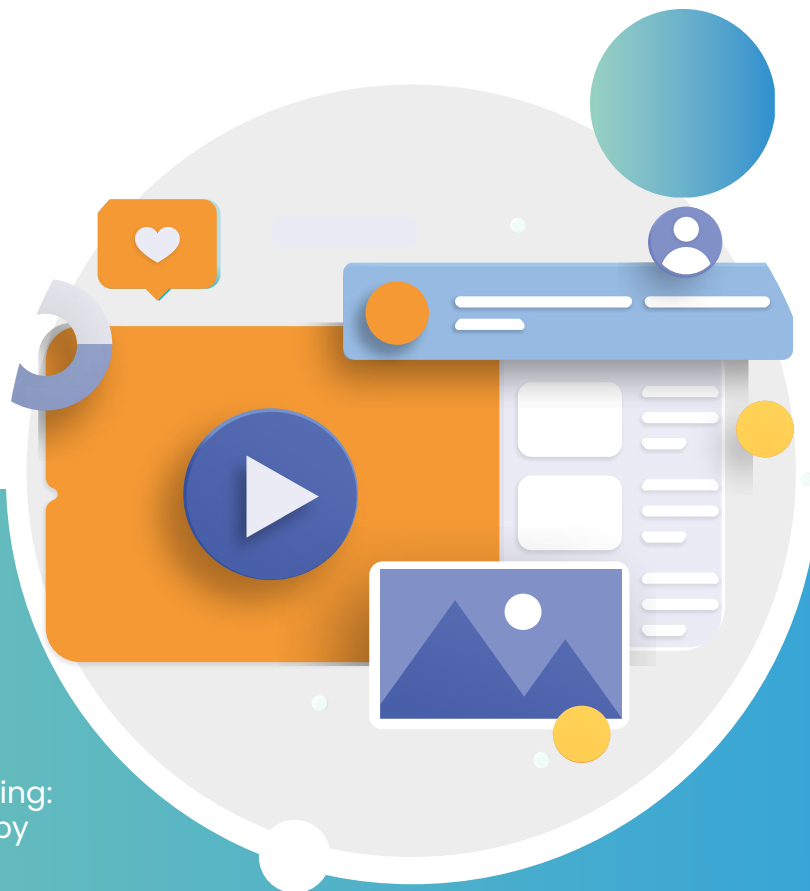

**NEO** uses a sophisticated technique that allows to the **NEO-WEB** and other Desktop Modules to use the same processing.

So, there are no desktop and web processing: there is only one type of processing used by all the modules.

## Real-time access:

**NEO-WEB** allows you to enter the most common commercial and financial operations instantly from your smartphone.

You can also consult dashboards for making the necessary decisions in a quick way.
